

Get Your Customer Back Online NOW!

Models 15M and 20

Get your customers electricity
back on in *minutes*, not days

Eliminate hassle and liability
of temporary above
ground cabling

Find Secondary Faults on YOUR
time, not the cable's time

The Servisavor® is a highly mobile unit designed to temporarily restore power to customers who have a single faulted conductor. By connecting the servisavor between the customers meter socket and his meter, power can be restored without immediately locating and repairing the cable fault or running temporary above ground conductors.

The Servisavor® restores load current on an open hot leg up to its current rating. On an open neutral the Servisavor® restores full service up to its current rating in neutral current.
