

Platform

Clearfield sets the standard for fiber performance with [FiberDeep](#) cable assemblies, while lowering the cost of broadband deployment with the [FieldSmart](#) fiber management platform and the [CraftSmart](#) OSP enclosure system.

[FieldSmart](#) is the only fiber management platform to be designed around a single architecture – [Clearview](#) Classic, [Clearview](#) Blue and the small count [Clearview](#) xPAK – for the inside plant, outside plant and access network. [FieldSmart](#) supports a wide range of panel and cabinet configurations, densities, connectors and adapter options, and are offered alongside an assortment of passive optical components.

[CraftSmart](#) is the industry's only field enclosure system optimized for fiber deployment at the network's last miles access point. These thermoplastic above and below-grade enclosures provide turn-key physical fiber protection for passive optical networks.

[FiberDeep](#) guarantees .2dB or less insertion loss on every singlemode patch cord and 12-fiber assembly deployed within the Clearview Cassette. No longer considered a commodity in today's cable plant, 4G networks require superior performance standards – and Clearfield delivers fiber connectivity products to ensure consistent reliability.

[WaveSmart](#) Optical Components are custom-built for the unique light requirements and interoperability needs of PON splitting, fiber exhaust scenarios and coarse and dense division multiplexing. Clearfield delivers unparalleled fiber performance with its optical components.

Installing fiber where you want it, when you want it, cost-effectively is the promise of the [FieldShield](#) Optical Fiber Protection Platform. Regardless of application, [FieldShield](#) takes fiber through the fields and streets to the home or business, up the tower to the antenna or throughout the riser to the data center or desk. Used in conjunction with Clearfield's [FieldSmart](#) fiber management solutions for the central office, outside plant and access network, [FieldShield](#) protects fiber through every distribution point of the network.

With a variety of products, Clearfield is your answer to for fiber network needs. We've sharpened our pencil – delivering superior form, fit and function at a price point un-matched in the industry.
